Il processo produttivo

The manufacturing process

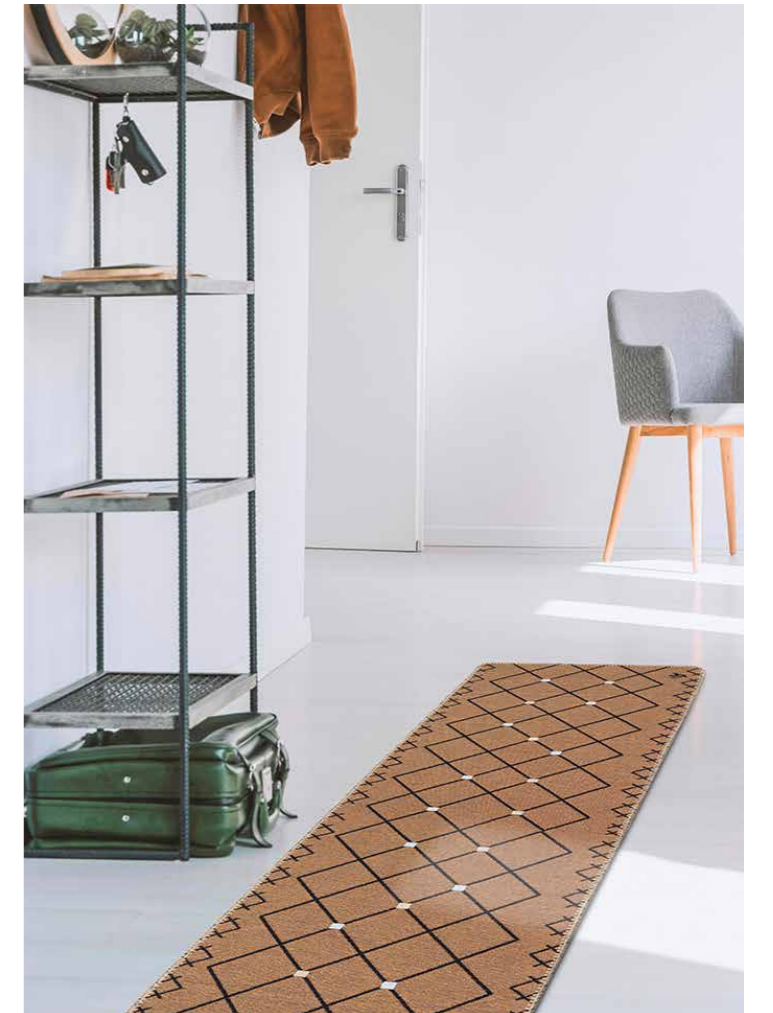

Il tappeto Marrakech proviene interamente da materiale riciclato. Il suo ciclo di vita è ecosostenibile: per la sua produzione vengono utilizzati scarti grezzi di cotone, dando così nuova vita a questi filati. I processi rispettano la natura del materiale e non ci sono processi di tintura chimica.

The Marrakech carpet comes entirely from recycled material. Its life cycle is eco-sustainable: raw waste of cotton is used for its production, thus giving new life to these yarns. The processes respect the nature of the material and there are no chemical dye processes.
